

Account Manager's Guide

[Microf Search — Full How-To](#)

For: Account Management Team
Microf — March 2026

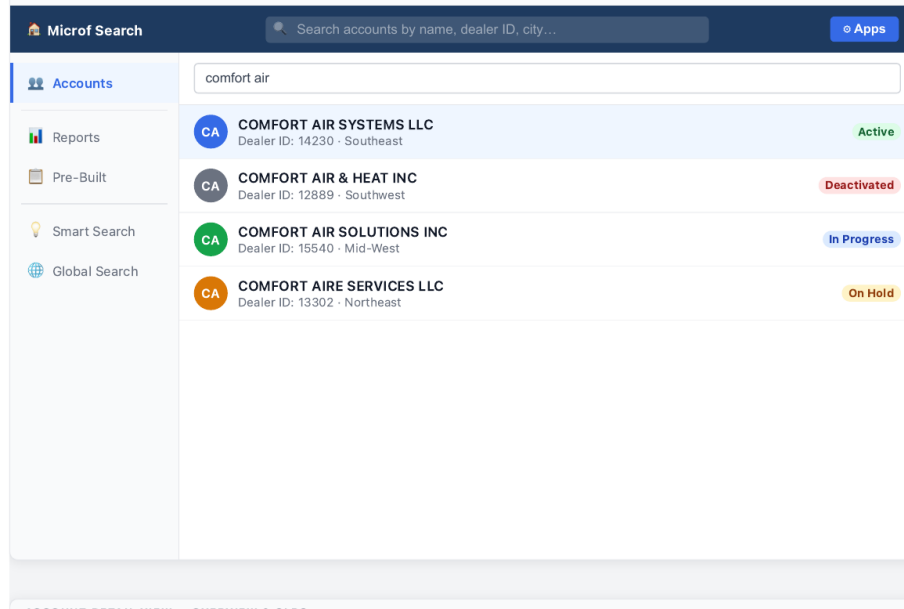

What's in this guide: Finding accounts, reading account details, running reports, using Report Builder, Smart Search, Global Search, and moving records between accounts.

#	Section	Page
1	The Interface	2
2	Finding & Viewing Accounts	2
3	Account Detail — SLPs, Contacts & Notes	3
4	Pre-Built Reports	4
5	Report Builder	5
6	Smart Search	6
7	Global Search	7
8	Move Records	8

1 · The Interface

Microf Search is accessed through your browser. Once logged in you'll see the main interface with three areas:

- **Left navigation** — switch between Accounts, Reports, Pre-Built Reports, Smart Search, and Global Search
- **Search bar** — type any account name, dealer ID, or city to instantly filter the account list
- **Apps button** (top-right) — opens the Apps hub where your tools live

2 · Finding & Searching Accounts

Type in the search bar at the top of the account list. Results update instantly — search by:

- Company name (full or partial — "comfort air" finds all matching names)
- Dealer ID number
- City or state

Each result shows the account name, dealer ID, region, and a status badge. Click any row to open the account detail view.

3 · Account Detail View

Clicking an account opens a detailed view split into two panels:

- **Left panel** — account fields, SLP records, contacts, and deals
- **Right panel** — Account Activity notes (call logs, status changes, enrollment history)

Strategic Lending Partners (SLPs)

SLPs represent a dealer's enrollment in a specific lending program (OPTIMUS, 360 Finance, Microf, etc.). Each SLP has a status, activation date, and Oracle Producer ID. An account can have multiple SLPs — one per program.

Status	What it means
Contractor Activated	Fully enrolled and active — dealer can use this program
Not Started	Enrollment hasn't begun for this program
In Progress / Pending	Enrollment is underway — waiting on training, docs, or BDR approval
Deactivated	Account has been suspended or closed for this program
On Hold	Account is temporarily paused

ACCOUNT ACTIVITY

OPTIMUS ACTIVATED

Mar 18, 2026

OPTIMUS SLP set to Contractor

Activated via EGIA reactivation email. Activation date set to 2026-03-18.

CALL NOTE

Feb 4, 2026

Spoke with James re: 360 Finance app. Waiting on credit approval. Follow up next week.

ENROLLED

Sep 1, 2022

Account enrolled in 360 Finance. Contract signed and returned.

4 · Pre-Built Reports

Pre-Built Reports are ready-to-run reports for the most common account management needs. Access them via **Pre-Built** in the left nav.

Available reports:

Report	What it shows
■ Active Contractors	All accounts with at least one Contractor Activated SLP
■ Not Activated	Accounts with enrollment requests that haven't been activated yet
■ Last App Date	Accounts sorted by most recent financing application
■ Last RPA Date	Accounts sorted by most recent RPA activity
■ Account Activity	All activity notes logged for the period
■ ARS Accounts	All American Residential Services locations

Filters & exporting:

- Use the **Region**, **Period** and **BDR** dropdowns at the top to narrow results before running
- Results show inline in the page — click **Export CSV** to download to Excel
- Click any account name in the results to jump directly to that account

The screenshot displays the Micro Search interface. The top section, 'Pre-Built Reports', lists six reports: Active Contractors, Not Activated, Last App Date, Last RPA Date, Account Activity, and ARS Accounts. Each report has a 'Run' button. The bottom section, 'PRE-BUILT REPORTS — RESULTS VIEW', shows the results for the 'Not Activated' report. It includes a table with columns: Account Name, Dealer ID, Program, Status, Enroll Request, BDR, and Region. The table lists six accounts with their respective details. The status column contains labels like 'Pending Training', 'In Progress', 'Not Started', and 'Waiting on BDR'.

Pre-Built Reports

Click a report to run it with the filters above.

- Active Contractors**
All accounts with at least one Contractor Activated SLP
- Not Activated**
Accounts with enrollment requests but not yet activated
- Last App Date**
Accounts by most recent application date
- Last RPA Date**
Accounts by most recent RPA activity date
- Account Activity**
All account activity notes for the period
- ARS Accounts**
All American Residential Services locations

PRE-BUILT REPORTS — RESULTS VIEW

Not Activated — 47 results · This Month · All Regions

[Export CSV](#) [Back to Reports](#)

Account Name	Dealer ID	Program	Status	Enroll Request	BDR	Region
ACME HVAC SERVICES LLC	16104	OPTIMUS	Pending Training	Mar 10, 2026	jsmith	Southeast
BLUE SKY MECHANICAL INC	15887	360 Finance	In Progress	Mar 8, 2026	kdavis	Southwest
COOL BREEZE SOLUTIONS LLC	16231	OPTIMUS	Not Started	Mar 5, 2026	jsmith	Mid-West
DELTA TEMP SERVICES INC	15990	Microf	Waiting on BDR	Feb 28, 2026	mwilson	Northeast
EAGLE COMFORT SYSTEMS	16088	360 Finance	In Progress	Feb 25, 2026	kdavis	Northwest

5 · Report Builder

The Report Builder lets you create custom reports by choosing exactly which object, fields, and filters you want. Access it via **Reports** in the left nav.

How to build a report:

Step 1. Select an Object — choose Accounts, SLPs, Contacts, or Deals

Step 2. Choose Fields — check the fields you want as columns in your results

Step 3. Add Filters — narrow results (e.g. Dealer Program = OPTIMUS, Region = Southeast)

Step 4. Click Run Report — results appear below; use Export CSV to download

Tip: Save time by starting from a Pre-Built Report if one is close to what you need, and use the Report Builder when you need a combination of fields not covered by pre-built options.

The screenshot shows the 'Microf Search' interface with a search bar and a left navigation menu. The 'Reports' section is active. The main area is divided into three sections: 1. OBJECT, 2. FIELDS, and 3. FILTERS. In the OBJECT section, 'SLPs' is selected. In the FIELDS section, 'Account Name', 'Dealer ID', 'Dealer Program', and 'Status' are checked. In the FILTERS section, 'Dealer Program' is set to 'OPTIMUS'. A 'Run Report' button is visible. Below the configuration, a 'SELECTED FIELDS PREVIEW' table shows the results for three accounts.

Account Name	Dealer ID	Dealer Program	Status
COMFORT AIR SYSTEMS LLC	14230	OPTIMUS	Contractor Activated
DELTA TEMP SERVICES INC	15990	OPTIMUS	Pending Training
SUNRISE HVAC LLC	16401	OPTIMUS	Not Started

6 · Smart Search

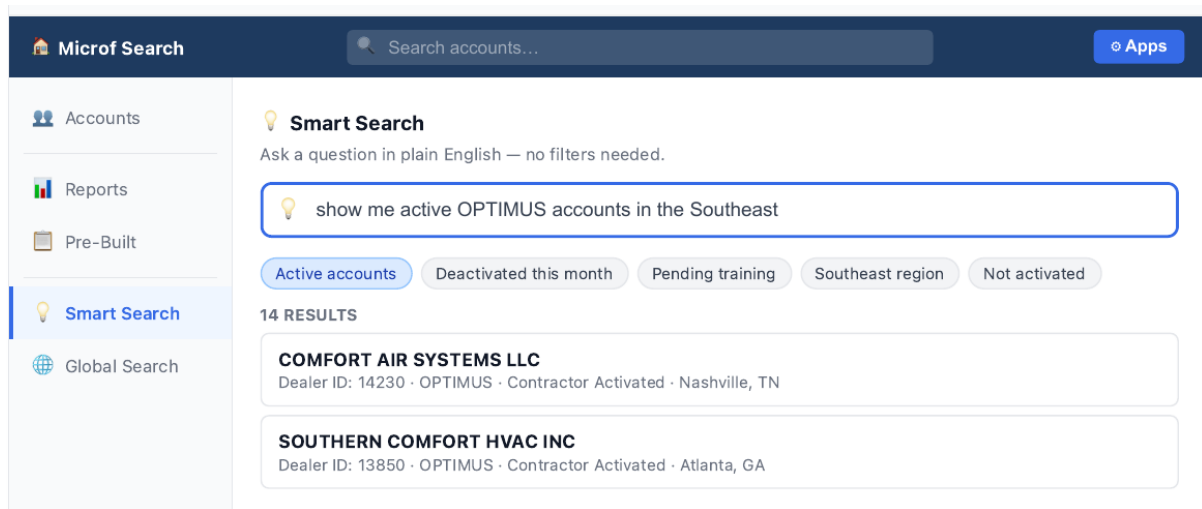

Smart Search lets you find accounts using plain English — no need to know which field to filter. Access it via **Smart Search** in the left nav.

How to use it:

- Type your question in plain English in the search box
- Use the quick-chips below the box for common searches (e.g. *Active accounts*, *Not activated*, *Southeast region*)
- Results show account name, dealer ID, program, status, and location
- Click any result to go directly to that account

Example queries:

- "Show me active OPTIMUS accounts in the Southeast"
- "Accounts deactivated this month"
- "Pending training in the Southwest"
- "Not activated with enrollment request this week"

7 · Global Search

Global Search lets you look up any specific value across any field in ActiveCampaign — useful when you have a piece of data (like an Oracle ID or email address) and need to find which account it belongs to. Access it via **Global Search** in the left nav.

How to use it:

- Select an **Object** (Accounts, SLPs, Contacts, or Deals)
- Select the **Field** you want to search within
- Enter the **value** to search for and click Search
- Results show the matching record and which account it belongs to

Common use cases:

You have...	Use Object	Use Field
An Oracle Producer ID	SLPs	Oracle Producer ID
A contact's email address	Contacts	Email
A BDR username	Accounts	Assigned BDR
A specific dealer ID	Accounts	Dealer ID

Search

1 RESULT

Oracle Producer ID TN-01204	Account COMFORT AIR SYSTEMS LLC	Program OPTIMUS	Status Contractor Activated
--------------------------------	------------------------------------	--------------------	--------------------------------

Example searches:

• Find all accounts with BDR = "kdavis" → Object: Accounts · Field: Assigned BDR

• Find a contact by email → Object: Contacts · Field: Email

• Find all SLPs with a specific Oracle ID → Object: SLPs · Field: Oracle Producer ID

MOVE RECORDS — MOVE DEALS, CONTACTS, OR SLPs

8 · Move Records

The Move Records tool lets you reassign a Deal, Contact, or SLP from one account to another. Access it via ■ **Apps** → **Move Records**.

When to use it:

- A deal was created under the wrong account
- A contact needs to be linked to a different account
- An SLP record is on the wrong account due to a data entry error

Steps:

- Step 1.** Open ■ **Apps** and click the **Move Records** card
- Step 2.** Select the tab for what you're moving: **Deal**, **Contact**, or **SLP**
- Step 3.** Enter the **Record ID** of the item to move
- Step 4.** Enter the **Account ID** of the destination account
- Step 5.** Click the Move button — the record is immediately reassigned

Finding IDs:

- **Deal ID / Contact ID / SLP ID:** Open the account → find the record → the ID is shown next to it or in the URL
- **Account ID:** Open the destination account — the ID appears in the page URL after `/accounts/`

■ **Note:** Move operations take effect immediately and cannot be undone from this tool. Double-check both IDs before clicking Move.

The screenshot shows the 'Move Records' interface within the 'Microf Search' application. The top navigation bar includes a search bar and an 'Apps' button. A left sidebar lists navigation options: Accounts, Reports, Pre-Built, Smart Search, and Global Search. The main content area is titled 'Move Records' and includes a subtitle 'Move a Deal, Contact, or SLP from one account to another.' Below this are three tabs: 'Deal' (selected), 'Contact', and 'SLP'. The 'Deal' tab contains two input fields: 'DEAL ID' with the value '48821' and 'MOVE TO ACCOUNT ID' with the value '15540'. Below these fields are instructions: 'Find the Deal ID in the account's Deals section' and 'Find the Account ID in the URL when viewing an account'. A blue 'Move Deal' button is positioned below the input fields. To the right of the input fields is a 'How to find IDs:' section with three bullet points: 'Deal ID: Open the account → Deals section → click the deal → ID is in the URL', 'Account ID: Search for the destination account → ID shown in the URL or account header', and 'SLP ID: Open account → SLPs section → ID shown next to each record'.

Quick Reference

Task	Where to go	How
Find an account	Accounts tab	Type in the search bar — name, dealer ID, or city
View SLPs & status	Account detail	Click any account → SLPs section in left panel
See activity history	Account detail	Click any account → Account Activity in right panel
Run a standard report	Pre-Built	Select report → set Region/Period filters → click Run
Build a custom report	Reports	Pick object → check fields → add filters → Run Report
Search in plain English	Smart Search	Type your question → click a result to open account
Find by any field value	Global Search	Pick object + field → enter value → Search
Move a deal/contact/SLP	Apps → Move Records	Pick type → enter Record ID + Account ID → Move

Tips & Reminders

- The **Apps** button is always in the top-right corner — your tools are always one click away.
- **Account status** reflects the overall account; each SLP has its own independent status.
- Use **Pre-Built Reports** for daily work; use **Report Builder** for one-off custom needs.
- **Smart Search** is the fastest way to find accounts when you're not sure of the exact name.
- **Global Search** is your best tool when you only have a piece of data (Oracle ID, email, etc.).
- Export any report to CSV to work with the data in Excel.
